

Melinda Mackey currently serves as the Director of Quality for Ascension Medical Group - Indiana. She has over 27 years of clinical experience in primary care, critical care, case management, nursing and operations management, quality improvement, and health information technology. In her current role, Mackey brings together her experience with data analytics and performance improvement, and her passion for patient advocacy. She oversees the ACO quality measurements and financial performance of commercial and Medicare Advantage contracts for St. Vincent's Medical Group- Indiana. Her interests are focused on four primary areas: Care coordination, pay-for-performance, health information technology, and leadership, and the roles they play in the current delivery system.
